

Sabi Ahamed J

Dindigul, Tamil Nadu — sabiahamed7@gmail.com — +91 9500959183 — linkedin.com/in/sabi-ahamed-j — github.com/sabi2006

Professional Summary

Motivated and adaptable aspiring Full Stack Developer with hands-on experience through academic and personal projects. Passionate about building practical, user-friendly solutions and applying problem-solving skills to real-world challenges. Skilled in developing web applications and working with modern programming technologies to create efficient solutions. Continuously learning and exploring AI and Machine Learning to enhance technical knowledge and build innovative applications.

Skills

Programming: Java, Python, JavaScript, HTML, CSS

Databases: MySQL, MongoDB, PostgreSQL

AI skills: Prompt Writing (zero-shot & few-shot),
Prompt Refinement, Structured Outputs
(JSON/lists), RAG, Vector Search, Semantic
Search, Python

Core : Data Structures & Algorithms, OOP, DBMS,
OS (basics)

Tools: Git, GitHub, VS Code

Soft Skills: Communication, Problem Solving,
Teamwork/Collaboration, Time Management

Education

B.Tech in Information Technology

PSNA College of Engineering and Technology, Dindigul, Tamil Nadu

2023 – 2027

CGPA: 7.6

Experience

AIML Intern – Phoneix Softech (June 2026)

- Worked on Artificial Intelligence using Python with practical project development.
- Designed and implemented machine learning models for real-world problem-solving.
- Focused on data preprocessing, model training, and performance optimization.
- Delivered an end-to-end AI project demonstrating intelligent solution design and testing.

Projects

Construction 3D visualizer and Brick Calculator (2026)

- Developed a construction estimation platform using Next.js, React, TypeScript, and Prisma.
- Built real-time brick, mortar, material, and cost calculations with unit conversion and wastage estimation.
- Created interactive 3D wall visualization using Three.js, React Three Fiber, and InstancedMesh.

Medical AI using RAG (Retrieval Augmented Generation) (2026)

- Built an AI-powered chatbot using RAG architecture; processed and indexed a 1.3 GB medical dataset for semantic search.
- Improved response accuracy by 40% and reduced query response time by 35% via optimized vector search.
- Designed a scalable pipeline handling 200+ concurrent medical queries with high precision.

Smart Trolley (2025)

- Developed a smart shopping trolley using React, Flask, MongoDB, and PostgreSQL with real-time IoT sensor integration.
- Built REST APIs and dashboards for inventory tracking and automated checkout, reducing checkout time by 40%.
- Implemented real-time barcode scanning, automated billing, and inventory management for a better shopping experience.

Certifications

- **AIML Engineer Certification:** Phoenix Softech (2026)
- **Linux Fundamentals (RH104-RHA):** Red Hat (2026)
- **HackSpora 2k25 – National Level 24 Hours Hackathon:** Participant, Karpagam Academy of Higher Education (2025)
- **JavaScript Certification:** HackerRank (2025)
- **MongoDB (CRUD) Developer Certification:** MongoDB (2024)

Achievements

- **3rd Prize, Hack-a-Cure (VIT Chennai):** Secured second runner-up position among 300+ participating teams in the 2025 hackathon.
- **3rd Prize, Hackovation 2.0 (VIT Vellore):** Secured second runner-up position among 100+ participating teams in the 2025 hackathon.
